Get World-Class Customer Support.

Register your copy of WordPerfect for Macintosh now. This entitles you immediately to world-class support from experienced technicians and specialists. See the User's Guide inside for details.†

WordPerfect

MACINTOSH®

Write better, work smarter, finish faster.

With WordPerfect 3.1, you concentrate on the words, not on the word processor. With Ruler-Bars™ and customizable Button Bars™, your most-used features are just a mouse-click away. Even sophisticated tasks like multiple columns, tables of figures, and grammar checking are easy.

And of course, WordPerfect 3.1 supports all the advanced features and technologies you bought your Mac for in the first place. For easy, convenient, and productive word processing, WordPerfect 3.1 is the perfect choice.

Advanced Writing Tools

Check grammar, style, and wording, as well as spelling. Advanced writing tools include a 111,000-word Thesaurus that helps you say exactly what you mean.

Graphics

Unleash your creativity with the built-in, feature-rich drawing package, complete with bezier curves. Or import outside graphics quickly and easily.

QuickCorrect

Correct spelling and capitalization and eliminate extra spaces, automatically, as you type. Expand two or three keystrokes instantly into your company's name—or your own.

Tables and Math

Create everything from customized calendars to data tables with variable row and column sizes. Use built-in math functions for self-computing expense reports and invoices.

Customized Document Design

Choose from hundreds of easy-to-use formatting tools to tame even the most complicated documents. Use columns, text boxes, bullets, headers, footers, and more to put your best ideas across effectively.

Document Experts

Use dozens of ready-made designs for letters, forms, faxes, expense reports, memos, calendars, and more. One click automatically formats your document according to accepted business standards. What could be easier?
